

NO MORE PANDEMICS!

via GLOBAL VECTOR CONTROL,

iMedDrs initiative – “LIVE AND LET LIVE” technologies:
Multilingual, virtual self-screening/caring apps
Locate and Isolate all VECTORS Everywhere -
to let the uninfected, unexposed LIVE as usual.

COVID variants- Beta from South Africa, Gamma from Brazil, Delta from India, Omicron from Botswana and A5 from Europe - have killed 1million Americans, 7million worldwide - so far.

Emerging seasonal variants, more contagious, lethal and immune-evasive can cause massive pandemic upheavals of the geo-political, socio-economic landscape of the planet, anytime. This ominous, potential global problem requires more international solutions than before.

iMedDrs – The Pandemic challenge:

The root cause of pandemics is virus-infected VECTORS, shedding and spreading contagion by **EMISSION** of virus-laden mucus and sputum, sniffing and sneezing, coughing and spitting and **TRANSMISSION** to others, airborne and by touch.

iMedDrs – Pandemic eradication rationale:

If there are **no vectors** roaming loose in public, there is **no emission** of viruses, **no transmission** to others by air, and therefore – **no pandemic**.

iMedDrs – Automated virtual tele-technology, Self-screening apps in local dialects and accents, smart-charts and publications (if no internet) empower the at-risk public anywhere, to

Locate and Isolate Vectors Everywhere

Self-caring apps help isolated vectors to live – and let live the uninfected and unexposed, free to enjoy life, liberty, livelihood, and leisure.

iMedDrs – global pandemic eradication by –

VECTOR-CONTROL AND VICTIM-CARE:

iMedDrs – Vector Control, Security Umbrella –

Vectors are filtered from the general public by symptom-screening and contact-tracing thousands simultaneously at ALL **outbreaks**.

iMedDrs – Versions in 1000 languages will provide **1 million** provider/person language combinations, to detect *all* contacts and cases, at home or abroad, on boarding and on-board, and at all borders – on-site, on-line or in-line.

Isolated vectors are also virus-infected *victims*:

iMedDrs – Victim Care, Safety interNet –

A *comprehensive* array of all-inclusive apps designed to empower *all* peoples, worldwide to care for themselves and each other. This significantly reduces responder-reliance and doctor-dependence in mass infestations.

In the event of a microbial outbreak:

The following is a comprehensive sequence of
iMedDrs self-screening and self-caring apps:

iMedDrs – MED BIOGRAPHY

to see if you have comorbid vulnerability.

iMedDrs – COVID SCREENING APP

to see if you have symptoms of infection.

iMedDrs – CONTACT TRACING APP

to see if you may have been exposed.

iMedDrs – VACCINE ELIGIBILITY APP

to see if you qualify or if you should avoid it.

iMedDrs – DAILY MONOLOGUE (SHISGO) APP

to see risks re “*should I stay or should I go*”.

If you go –exercise precautions.

If you stay because of risk, vulnerability, contact, tested positive or symptomatic,
stay safe at home with iMedDrs caring apps:

iMedDrs – HOME HEALTH RESOURCES

iMedDrs – HOME CARE app while in isolation, to self-monitor regularly, in patient languages, to detect symptoms and complications –
“*know what's wrong, why and when to call, who to call, what to say, what to expect*”:

iMedDrs – PROFESSIONAL RESOURCES:

Depending on level of respiratory infection (RI), consult the *appropriate* healthcare provider – with computer-generated reports on-line:

iMedDrs – PHARMACY CARE app (upper RI)

iMedDrs – CLINIC/MD CARE app (mid RI)

iMedDrs – EMERGENCY CARE app (lower RI)

iMedDrs – HOSPITAL CARE app (extra RI)

iMedDrs – SPECIALTY REFERRAL APPS:

To provide the specific medical information required by the particular specialty:

iMedDrs – RESPIRATORY specialist app,

iMedDrs – CARDIOVASCULAR specialist app,

iMedDrs – GASTROINTESTINAL specialist app,

iMedDrs – GENITO- URINARY specialist app,

iMedDrs – NEUROLOGIC specialist app,

iMedDrs – PSYCHOLOGIC specialist app.

Multilingual, virtual screening/caring apps

iMedDrs – IMPLICATIONS:

have been designed and developed to:
educate all peoples to recognize symptoms,
locate vectors by automated virtual screening,
isolate symptomatic, contacts and +ve tested,
evaluate victims – *self-care* of simple situations,
communicate – *tele-care* of complex conditions,
navigate today’s complex medical expertise,
liberate the uninfected and unexposed.

IF YOU WANT TO LIVE AS USUAL:

Locate and Isolate Vectors Everywhere!

GLOBAL PANDEMIC MITIGATION VIA THE US:

United states world leadership is positioned to enter the annals of medical history:

21st century Elimination of Microbial

Pandemic Threats to Humanity FOREVER.

Global vector control is reminiscent of the **US-led** worldwide vaccine-based smallpox eradication that ushered in the incredible age of **vaccination** in the 20th century.

Currently, the US has the opportunity and capability to organize and co-ordinate a *national* and an *international coalition* of advanced global entities to this end.

These include internationally entrenched political, medical, linguistic, public health, technological, Internet, social media etc.

This US leadership initiative also serves to unite a divided international community, to combat a recurring threat to humanity.

NO MORE PANDEMICS

This historic transformative initiative is now possible by a US-led, inspired and implemented, internationally standard, all-inclusive global vector control pandemic-response to ALL outbreaks: from zoonotic or synthetic (WMD) mutant inception anywhere to endemic variant infestation everywhere.

It should be done.

It can be done.

WE can do it.

Let’s do it – now.

Preferably by US world leadership.

Victor K. Misir MD. Email: iMedDrs.vk@gmail.com

NB. Implementation of iMedDrs Global Vector Control resources enables eradication of all other pandemics like Ebola, Avian Flu, HIV, WMD, etc.
